PROJECTS

[08/2023 – 03/2024]

Bone Disease Prediction

Final year Major Project - I worked with a team and mentor on a bone disease prediction project for five months, which we presented and successfully published in the ICIRIAC conference proceedings.

Link: <https://doi.org/10.1063/5.0247680>

[02/2023 – 05/2023]

Decentralized File Storage

Mini Project - I independently developed a decentralized file storage system, focusing on enhancing security, accessibility, and data integrity. This project deepened my understanding of blockchain-based storage solutions and their real-world applications

[01/2023 – 04/2023]

Crypto Currency Tracker

Mini Project - Collaborated with a team and mentor on a cryptocurrency tracker project, developing features for real-time tracking and analysis. This experience enhanced my understanding of financial data management and blockchain technology.

[03/2023 – 04/2023]

The Prediction of Adult Income Based on Census Data

Mini Project - Utilized Python for data analysis and machine learning to predict income levels based on census data. This project enhanced my skills in predictive modeling, statistical analysis, and programming.

[07/2022 – 10/2022]

Query Chat Bot

Mini Project - Worked as part of a team to develop a chatbot designed to handle user queries efficiently. The project focused on enhancing natural language understanding and improving automated response accuracy.

HOBBIES AND INTERESTS

Skills
